Education

2014 | Kasetsart University
MBA, Finance
GPA 3.53 / 4.00

2010 | Khon Kaen University
B.Eng. in Computer Engineering
GPA 3.07 / 4.00

Expertise

- AI-Native Development (Claude Code)
- Agent Harness Engineering
- Multi-Agent Orchestration
- RAG & LLM Integration
- React · Vue / Nuxt · Angular
- Node.js / NestJS · C# / .NET
- REST APIs · Webhooks · OAuth
- AWS · Vercel · Docker · CI/CD
- SQL · MongoDB · Redis
- Unit & E2E Test Automation

Language

- Thai — native
- English — professional

Supapong Ngonkham

Senior Full-Stack Engineer · AI-Native

Profile

Senior full-stack engineer with 15+ years shipping production web applications across FinTech, payments, and insurance, and the last two years building AI-native: directing Claude Code agents to produce mergeable pull requests, enforcing quality through automated test loops, and turning recurring AI mistakes into reusable context and guardrails. Designed and built Covera end-to-end, an AI-powered insurtech SaaS built on RAG over Thai insurance documents, OCR, and PDPA compliance gates. Strong JavaScript/TypeScript fundamentals across React, Vue, Angular, and Node, backed by deep experience in .NET, SQL, and AWS. Based in Bangkok; fluent in English.

Experience

Sep 2025 – Present
Jaidee Innovation Co., Ltd. · Bangkok

Senior Full-Stack Engineer (AI-Native)

Agent harness — reusable across projects

- Built a personal agent harness around Claude Code: CLAUDE.md rules, skills, hooks, and MCP tools give every agent shared context and guardrails.
- Subagents for implement, review, and test run in parallel across git worktrees, orchestrated automatically under scoped permissions.
- Quality gates: automated unit/E2E tests, eval sets for AI output, AI observability, and a manual deploy gate for production.
- Packaged as a template repo: one command scaffolds a new project with base rules and git policy preconfigured.

Covera — AI SaaS for Thai insurance agents

- Owned architecture and end-to-end delivery (Nuxt 3, TypeScript, MongoDB Atlas, Vercel).
- Built the RAG pipeline for policy Q&A over Thai insurance documents (PDF ingestion, MongoDB Atlas Vector Search, OpenAI embeddings, Claude Sonnet) with citation-enforced validation, so every answer is traceable to its source.
- Shipped OCR policy scanning, a financial-planning module (needs analysis, coverage-gap calculation), and a client follow-up tracker.
- Built an AI assistant for agents, with PDPA consent and suitability-test gates built into the workflow.
- Delivered as an installable PWA for a native-feeling iPad experience.

Client platforms

- Environment Platform — environmental-services marketplace (Vue 3, NestJS, AWS).
- Cosmate — clinic-management SaaS for cosmetic clinics: patient records, booking, treatment packages, POS and billing, inventory, staff commission reporting.
- Set up CI/CD pipelines and AWS infrastructure for reliable, repeatable delivery.

Certifications

Life Insurance Agent License
Office of Insurance Commission (OIC), Thailand

Investment Consultant (IC) License
Securities and Exchange Commission (SEC), Thailand

Microsoft Innovation Center Developer Program
C# .NET · 2010 – 2011

Core Skills

AI-native engineering
Claude Code, agent harness engineering (CLAUDE.md rules, skills, hooks, MCP tools, subagents, git worktrees), multi-agent orchestration, eval sets and AI observability, RAG pipelines (vector search, embeddings), LLM API integration (Anthropic, OpenAI)

Frontend
React, Vue 3 / Nuxt 3, Angular, TypeScript, JavaScript (ES2020+), HTML5/CSS3, PWA, Flutter

Backend & APIs
Node.js / NestJS, C# / .NET 6+, REST API design, webhooks, OAuth, gRPC; Python (Django) — working knowledge

Data
PostgreSQL, MySQL, SQL Server, MongoDB Atlas (incl. Vector Search), DynamoDB, Elasticsearch, Redis; query optimization, concurrent-write handling

Cloud & DevOps
AWS (Lambda, ECS, EC2, S3, RDS, Batch, CloudWatch), Vercel, Docker, CI/CD, GitHub

Quality
Unit and E2E test automation, self-validating agent loops, refactoring live codebases, security-minded design

Ways of working
Agile/Scrum, product and design collaboration, mentoring and technical training, Notion, Slack, Figma

Experience (continued)

Sep 2023 – Aug 2025
Krungsri Nimble Co., Ltd.
Outsourced via PP&P Advance · Bangkok

Full Stack Developer

- Developed and maintained features for KMA, Krungsri's mobile banking app — Flutter frontend backed by C# REST APIs.
- Delivered to bank-grade coding standards and security protocols.

May 2021 – Sep 2023
2C2P Co., Ltd.
Payment gateway · Bangkok

Full Stack Developer

- Developed and maintained PACO, a payment-gateway application for banks — Angular frontend, .NET 6 backend, MySQL and DynamoDB storage, Elasticsearch integration.
- Integrated AWS services (Lambda, ECS, Batch) and owned the performance and reliability of live payment flows.
- Led architecture and design-pattern training for developers; escalation point for the team's hardest technical problems.

Jul 2017 – Apr 2021
BlueVenture Group PCL
Insurance systems · Bangkok

Full Stack Developer

- Built and maintained an insurance operations dashboard (Angular, .NET Core) used by insurer officers for claim approval, verification, repair scheduling, and garage-satisfaction tracking.
- Designed scalable backend services and secure API integrations with partner insurers.

2016 – 2017
Kasikorn Securities PCL
Research Department · Bangkok

Quantitative Analyst

- Collected and analyzed market data from Bloomberg, Bank of Thailand, and NSDB for research analysts.
- Automated recurring daily tasks with Excel macros and VBA.

Earlier Career

2012 – 2013
Eagle Technology Co., Ltd.
Bangkok

Freelance Developer

- Freelance developer for Eagle-HRS, a Thai HR and payroll software house serving 300+ companies.
- Developed features for its HR application in .NET.

2011 – 2012
Ookbee Co., Ltd.
Bangkok

Mobile Application Developer

- Joined during Ookbee's early growth as Thailand's leading e-book store.
- Built and maintained features for its iOS and Android apps.

2010 – 2011
Microsoft Innovation Center
Bangkok

Developer (C# .NET)

- Part of Microsoft's global network supporting local software developers.
- Developed C# and .NET applications and completed the developer program.
